G. Hubert, " " " "	2.00

\$235.53

In rendering the above report of expenses of highways, would say that the sum of \$1,338 was appropriated and two thirds of the sum, by vote of town, to be laid out in summer and the balance in winter, which we have tried to carry out.

There are some culverts that ought to be laid over, and bushes that should be cut. Howard Avenue ought to be paved in the ditches, as they gully bad in large showers. The water has to run two thirds of the Ave. in same ditch.

Have paid \$87.00 for plank for upper iron bridge, repaired concrete about \$22.00, laid out on sidewalks \$76.00, plowing and sanding, built over twelve culverts, built twenty water bars with crushed stone and they prove well, they ought to be laid all over town. Road machine has been used 24 3-4 days.

Macadam road has been built from John Senter's to sidewalk crossing below, about 700 feet in length, also from Mrs. F. J. Eastman's corner to near south line of J. C. Wyatt's, about 400 feet in length, also in front of F. B. Shedd's, 30 feet wide, one piece west of the above to L. C. Morrison's line, for which Mr. Shedd contributed \$150.00, which mostly covered the expense of building about 800 feet long, 16 feet wide.

LEROY BROWN,		
GAWN GORRELL,		

Report of the School Board

FOR THE

Town School District of Northfield.

Our schools have been conducted much as heretofore and with a general degree of success. We have endeavored to secure the services of those teachers having the ability and desire to impart the instruction most needed by their pupils. We believe that all persons and more especially parents have a deep and lasting interest in the best education we are able to give the rising generation, and that it be done in the surest and earliest manner, which we have no doubt is the cheapest.

Realizing that the place where the minds of the young are trained is the place where the country is made, where the love of knowledge resides is the place where rulers are made and where the flag floats over the work of all the pupils love of country and of fellow countrymen go hand in hand.

We early in the school year took advantage of the wave of patriotism that swept over the country.

By the aid of the teachers and pupils, assisted by the friends in the different schools, both at home and abroad succeeded in procuring a flag for each of the schools. We hope that the Stars and Stripes floating above the school houses with the appropriate exercises on our public days, will have a tendency to increase the love for country and respect for our flag in the hearts of our children as well as parents and friends.

The training of a child is incomplete unless it teaches him to love his flag. If it does this he will work harder and so

benefit himself and those around him. He will be actuated by nobler motives and thought, will aim higher, and if he continues studying beneath this emblem of freedom of speech and personal liberty, he will become a better citizen at home, and a staunch defender of it abroad. If the spirit of a true American boy defends it now, how much better will he do so when a man. Our children we believe will find it much pleasanter studying our history with the flag floating above them.

We desire in this report to extend our sincere thanks to all at home and abroad who assisted in any way to aid in this patriotic effort.

The custom of visiting schools by parents and citizens in each school district is helpful to teachers, scholars and visitors. It leads to a better understanding between all who are in any way connected with the schools and their management and increases the sense of responsibility which all ought to feel for the largest measure of success attainable under our present school system, and we hope this time-honored custom will be more generally observed in the future.

We have been very fortunate in obtaining good teachers, and those of experience, and they have proved faithful and efficient and all we could reasonably expect.

BAY HILL.

Summer and fall terms taught by Miss Kate Forrest. At the closing examination of the summer term the school appeared well and apparently had made good progress. The fall term closed two weeks before we intended, on account of the weather and before we had opportunity to visit it.

BEAN HILL.

There is no school in town we enjoy visiting more than we do this one, and there are three reasons we will give.

1 Mrs. Lillian Davis Moorhouse is one of the best of teachers, true in every spot and place.

2 The pupils are all bright and keen and all seem to feel that their business in school is to learn. But better still, the parents all want to go to school, and we find them there, all interested in the examination. Under these circumstances the school could not be anything but a success. 'The parents all say "keep Mrs. Moorhouse in the school if you can."

CENTER.

Both terms taught by the tried and proved true and faithful Kate Sanborn. Miss Sanborn does not make so much spread in school as some, but like one of those good and pure men we have known in the ministry, her work is honest, patient and conscientious. And this school which has been under her charge for three years is pushing forward to the front rank, showing the advantage of retaining a good teacher when one is found. There was a large attendance of parents and friends at the closing exercises. The improvement in penmanship was very marked, and the examination was all one could desire.

HODGDON.

We found much difficulty in procuring a teacher for this school. There seems to be an element in this district that is not found anywhere else in town. And the experience the different teachers have had in the past has been such that a teacher who knows the district will not engage the school. We are glad to be able to say that there seems to be a change for the better.

The spring term was taught by Frances Elder, this was her first term in town, she had taught several terms elsewhere. Miss Elder is a fine scholar, a lady of refined manners and pure character. The school however was not a complete success,

owing in a measure to poor discipline, but more to a spirit of fault finding before their children by parents.

The fall term was under the care of Carrie W. Carpenter. The term was interrupted by sickness, but in other respects was a grand success. Never have we seen so marked a change for good, both in deportment and study.

Miss Carpenter is an experienced teacher and came to us highly recommended, she proved herself worthy of all praise. The public examination was gratifying. We were glad to see so goodly a number of the friends of the school at the closing exercises.

OAK HILL.

Both terms taught by Alice G. Shaw. Miss Shaw is one of our best teachers, she enters into her work with zeal and makes a success of whatever she undertakes. The fall term was brought to a premature close owing to sickness, consequently there was no public examinations, we had however visited the school several times and know that good progress was being made. The examination for the spring term was highly satisfactory, and the large number of visitors gave proof that the teacher had the cooperation of the parents. Such interest on the part of the friends of a school is a great inspiration to a teacher.

We hope to be able retain Miss Shaw in town for the coming year. But we want to say right here that if the friends of education want to retain their first-class teachers we must have the money to hire them. Other school boards are looking after just such teachers, and the board that pays the best will get them.

POND.

This is the smallest school in town. The spring term taught

by Mabel Drew gave good satisfaction. This was Miss Drew's first effort. She proved an excellent instructor, the children passed a good examination, the term was a success. We think Miss Drew will become a first class teacher.

The fall term was under the care of Marcia W. Lovejoy. Mrs. Lovejoy is a teacher of experience but had not taught for several years. The examination however showed that she had lost none of her zeal and ability to interest and instruct her pupils. Both parents and pupils were pleased with her efforts. The register does not show a case of tardiness for the whole school year.

RAND.

The school was under the care of Miss Etta F. Heath. Miss Heath is one of our most experienced and successful teachers. To retain her services is a sufficient guarantee of a most successful and prosperous school.

TEBBETTS.

This school was under the instruction of Miss Lela G. Durgin. Miss Durgin labored earnestly for the advancement of her scholars with excellent success, making thorough progress and accomplishing very satisfactory results.

ANNUAL REPORT

OF THE

BOARD OF EDUCATION,

OF UNION SCHOOL DISTRICT, NO. 1, IN TILTON.

During the past year, our schools have, we think, been doing good work.

We have escaped any epidemic of disease, and, in fact, not within the term of any member of the present board has it been necessary to close the schools, on account of sickness.

The board deemed it to be prudent, as well as a good sanitary measure, to have the walls and ceilings, of all of the rooms, whitened.

Inasmuch as this had not been done for several years, it seemed to be wise, especially as the walls were in very bad condition.

The rooms as a result look very much cleaner, and must of necessity be more healthv.

Two of the basement windows have been covered with wire screen cloth, on the inside, saving some broken glass; as in stormy weather the basements are used as play-rooms.

One of our teachers left us for a wider field of usefulness, thus requiring one change in our corps of instructors.

During the year a few shade trees have been set out, near

the street line; new water pails, with covers, and faucets, have been purchased and placed in the halls; also the old tin dip-pers have been replaced with thick glass mugs.

Two complete sets of maps 41x58 inches have just been purchased, and will be, at once, placed in the rooms for daily use. Blaisdell's Physiologies have been introduced. About \$10.00 worth of new books have been added to the supplementary reading, and Cyr's fourth reader added to those we already had.

The basement of the building is in very bad shape. The old cement bottom being badly broken, and in some places almost entirely gone. The cold air boxes connected with the furnaces, ought to be replaced before another winter, by new boxes. The dome in one of the furnaces is badly cracked, and before very long, both furnaces must have new galvanized iron jackets around them.

Some of the floors in the school rooms are badly worn, and if the building is to continue in use for a few years more, ought to be relaid with tight new floors.

The Board of Education is unanimous in the opinion that the district cannot, much longer, dodge the question of a new building.

Three of our rooms are not well lighted, the ventilation is very poor, and the sanitary arrangements ought to be dispensed with, and modern and healthful plumbing take their place.

Of course the district will readily understand that in the present building much that would be considered essential in a new building cannot be attained in its present condition.

It is difficult to teach lessons of thrift and neatness, and to impress upon the pupil's mind ideas of care of public property, when that same becomes worn out from constant use of a generation.

You will remember that, at the last annual meeting, another committee was chosen to report at our next meeting, giving some definite idea as to the requisite needs of the district at the present time ; also to give figures and estimates in a general way as to the probable cost of what will be required.

The annual meeting will be called for Friday evening, Mar. 24, at 7.30 o'clock.

We will try and have the building lighted so that voters can inspect the building between seven and seven thirty o'clock, prior to the meeting.

Let all who have children in the schools make a special effort, at any time before March 24, to go all over the building, and see if what we say is not true.

Perhaps it might be well to state a few figures for the past year. As the financial year is not yet closed, we have taken the last year's figures, closing March 1898.

It cost the district \$15.09 per scholar for the year for *all* expenses. This includes salaries of teachers, care of building, books and supplies, repairs, tuition at the Seminary.

It cost 80 2-3 cents per scholar, to care for the building. It cost 86 cents per scholar for repairs. It cost 85 cents per scholar for books, supplies, paper, pencils, etc. It cost 71 7-9 cents to keep each scholar warm during the year. It cost 41 11-12 cents per scholar, per *week*, for all expenses, including Seminary tuition.

Other figures including the data for this year will be given at the annual meeting. Comparisons will be made with other towns and we think we will convince you that we are getting our schooling less, per scholar, than many of our neighbors.

During the year there have been different pupils registered as follows :

	Boys.	Girls.	Total.
1st Primary,	21	31	52
2nd “	21	22	43
1st Intermediate,	29	22	51
2nd “	16	14	30
1st Grammar,	22	16	38
2nd “	24	14	38
	<hr/>	<hr/>	<hr/>
	133	119	252

Respectfully submitted,
